Nicosia, Cyprus

PROFILE

Computer Science graduate with a First-Class dissertation in object recognition under partial occlusion, now pursuing an MSc in Artificial Intelligence at the University of Cyprus. Two years of experience building enterprise systems with C#, APIs, SQL data work, and workflow automation on Appian and Power Apps, with a focus on reliable systems, computer vision, and applied machine learning.

EXPERIENCE

Analyst / Developer · Alpha Bank Cyprus — NOV 2025 - PRESENT

- Key role in the AstroBank to Alpha Bank migration, moving and validating sensitive customer data. The work demanded extreme attention to detail because mistakes were not an option.
- SQL-heavy work: writing and validating queries, reconciling data across systems, and supporting reporting.
- Actively building applications and systems with C#, APIs and newer technologies, including Appian and Power Apps, to remove friction across banking operations.
- Joined as the newest and youngest member of the team and was trusted with responsibility in a high-stakes migration.

Analyst / Developer · AstroBank — AUG 2024, OCT 2025

- Developed and maintained enterprise applications with C#, APIs, Appian and Power Apps.
- Worked with SQL for data processing, validation, and reporting.
- Took on leadership responsibilities in project delivery and cross-team coordination.

Maintenance Course · Wargaming — MAR 2024, MAY 2024

- Gained hands-on experience in DevOps pipelines, system security, networking, and infrastructure automation.
- Strengthened technical problem-solving and collaborative skills.

Cyber Security Intern · Deloitte — SEP 2022 & JUN 2023

- Supported cybersecurity assessments, incident response, and implementation of security controls.
- Worked with cross-functional teams to address security and compliance issues.

Infantry Soldier · Cypriot National Guard — JUL 2020, SEP 2021

- Developed discipline, resilience, and strong teamwork skills under demanding conditions.

EDUCATION

MSc Artificial Intelligence · University of Cyprus — 2026 - 2028 (EXPECTED)

- Postgraduate study in artificial intelligence, machine learning, and applied research.

BSc Computer Science · University of Southampton — 2021 - 2024

- Upper Second-Class Honours (2:1).
- Dissertation: App Development for Object Recognition, Addressing Partial Occlusion, First-Class.
- Relevant modules: Computer Vision, Cloud Application Development, Foundations of Machine Learning.

Pre-University Qualifications · Cypriot Lyceum — 2015 - 2020

- Apolytirio 18.33/20; A-Level Mathematics (A*) and Further Mathematics (A*).
- Pearson LCCI Levels 1-3 (Merit and Distinction); 6th place, Nicosia Physics Olympiad; IELTS 7; ECDL Standard.

SKILLS

LANGUAGES	Greek (native), English (fluent)
DATA / SQL	SQL queries, data migration, validation, reconciliation, reporting, sensitive data handling
PROGRAMMING	Python, Java, C++, C, C#, Haskell, Assembly, SQL, JavaScript
AI / ML	Machine learning algorithms, computer vision, object detection and segmentation, dataset design, model evaluation, prompt engineering
TOOLS	Linux, Appian, Power Apps, Postman, REST APIs, Git/GitHub, Azure Functions, Cosmos DB, Streamlit, React, Node.js
SECURITY	Cybersecurity principles, incident response, networking fundamentals, hardware/software troubleshooting

SELECTED PROJECTS

Occluded Object Recognition · First-Class dissertation — 2024

- Built a synthetic occlusion dataset generator and a YOLOv8 testing application in Python and Streamlit.
- Evaluated detection and segmentation under progressively hidden objects.

GameCraft · Cloud application — 2023

- Full-stack community platform for submitting, reviewing, and voting on game ideas.

Quiplash Remake · Real-time multiplayer — 2023

- Recreated the party game with Node.js, Express, Azure Functions, and Cosmos DB.
